

SEARCH ENGINE OPTIMIZATION

Redefine your organic traffic

Having a sound organic search strategy is crucial to the success of your business. It can work on your behalf to deliver your site to interested prospects at the right time, while keeping your costs low. Optimizing your SEO approach is a crucial component of effectively and efficiently delivering qualified prospects to your site, and requires a proven, comprehensive approach.

Cardinal Path is an award-winning marketing analytics and optimization consulting firm which has helped some of the world's most recognized brands to get found, engage visitors, and monetize their search efforts. We also offer automated, standardized reporting to assist our clients who may lack the time, specialized resources and know-how to optimize the value of online inventory.

Questions to consider when assessing your current SEO strategy:

- Do my marketing analytics help achieve business KPIs? More importantly, do they give indications of what works and what doesn't work in driving meaningful traffic?
- How valuable is the share of visitors to my site? How does social media impact my search visibility? How are consumers visiting your sites and what are they doing when they're there?
- Are search engines able to readily crawl and index your site? Is the content resonating with searchers? How can we improve and maximize our content marketing efforts?

Dynamic Template Reports YOY, MOM, WOW:

Sample of key metrics provided:
